

**Waste Management Hierarchy**

- Prevention** – New equipment sales  
Purchase energy efficient technology that can be easily upgraded or recycled.
- Minimisation** – Upgrades and repairs  
Upgrade existing technology to prolong life or reduce energy.
- Reuse** – Microsoft refurbisher program  
Make available surplus equipment to others who don't need or can't afford the latest equipment.
- Recycle** – Send for recycling or further reprocessing  
Break-down and convert back into new raw materials
- Energy Recovery** – may occur as a process of down-stream recycler  
If possible convert waste into energy before disposal
- Disposal** – may occur as a process of down-stream recycler  
Dispose safely, treat harmful waste and minimise landfill

The below areas are outside the control of Aspitech's processes and may constitute less than 1% of all e-waste sent for recycling.

Streamed appropriately for minimum waste
